

ROSEHILL TPV® PUR Impermeable Full PUR System

Specifically designed for venues hosting world class international and national athletics competitions, Rosehill TPV® PUR is at the forefront of synthetic track technology, delivering the ultimate in performance and durability.

This impermeable, triple layer system uses high quality Rosehill TPV® rubber granules in every layer to create a full coloured solid PU athletics track that is hard wearing and long lasting. Laid in situ, the first two layers consist of Rosehill Flexilon® binder embedded with high performance, Rosehill TPV® coloured rubber granules.

A spike resistant wearing course of Rosehill TPV® rubber granules is then broadcast onto a flood coat of uncured Rosehill Flexilon® binder to create an elite standard track surface for maximum performance.

ADVANTAGES

- // Excellent shock absorption properties
- // Highly spike resistant surface
- // Waterproof
- // Durable, long lasting surface
- // Suitable for all weather conditions
- // Low maintenance

APPLICATIONS

- // International, national and regional competition venues
- // Elite track & field athletics training facilities

TECHNICAL FEATURES

Rosehill TPV® PUR - Impermeable Full PUR System

1. Primer

Rosehill Flexilon® 1103/3672

2. Base Layer (5mm)

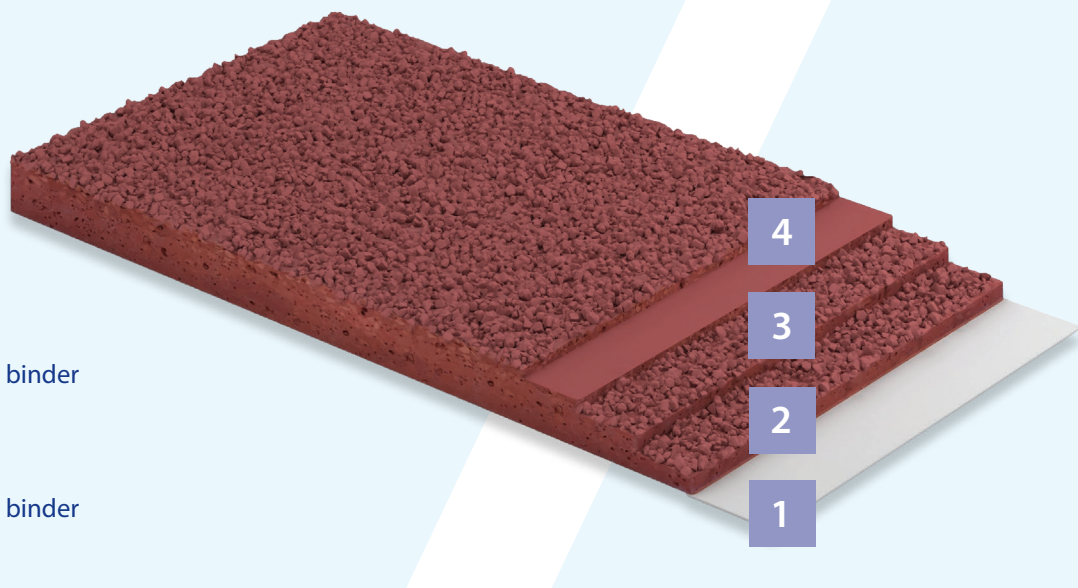

Rosehill TPV® 1-4mm
Rosehill Flexilon® 3675/3676 binder

3. Middle Layer (5mm)

Rosehill TPV® 1-4mm
Rosehill Flexilon® 3675/3676 binder

4. Top Layer (5mm)

Rosehill TPV® 1-4mm
Rosehill Flexilon® 3675/3676 binder
