

## **ROSEHILL TPV® SWM** Impermeable Polymeric Sandwich System

Rosehill TPV® SWM is an excellent all round surface for multi-use facilities looking to accommodate a wide range of sports, including football, basketball and hockey, plus general training and athletics practice.

Constructed in two layers, this impermeable polymeric sandwich sports surface (UK-Type 4) is laid in situ. The base layer is made up of 100% recycled black rubber granules bound with Rosehill Flexilon® polyurethane resin. This is then sealed and coated with a durable granular wear layer of high quality Rosehill TPV® rubber granules broadcast onto a flood coat of Rosehill Flexilon® binder. The surface is finished with an anti-slip coating and line markings.

Easily maintained, this durable, skid resistant system provides users with a consistent, high quality multi-activity surface to play on all year round.

## ADVANTAGES

- // High grip finish
- // Versatile for a variety of sports
- // Durable hard wearing finish
- // Play 365 days a year
- // Waterproof
- // Suitable for all weather conditions

## APPLICATIONS

- // Multi-use games area for football, basketball, general sports and play
- // Schools, colleges and universities
- // Public parks, recreation and sports facilities

## TECHNICAL FEATURES

Rosehill TPV® SWM - Impermeable Polymeric Sandwich System

### 1. Primer

Rosehill Flexilon® 1103/3672

### 2. Base Layer (10-11mm)

Recycled Rubber Ganules 1-4mm  
Rosehill Flexilon® 1102/1230 binder

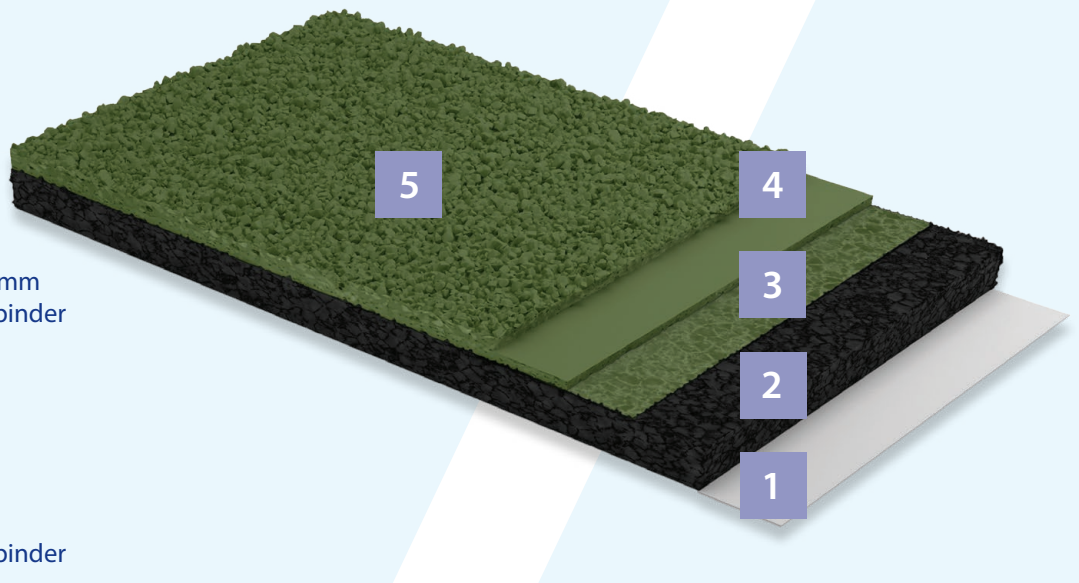

### 3. Pore Sealer

Rosehill Flexilon® PS2

### 4. Top Layer (2-3mm)

Rosehill TPV® 1-4mm  
Rosehill Flexilon® 3675/3676 binder

### 5. Anti-slip coating and line markings
